Join our Sustainable Efforts

Reinvented Compact with Less Materials

Our latest printer comes with a sleeker, smaller frame not just for aesthetics, but for the Earth. By reducing material use in hardware design, we cut down on manufacturing resources, packaging waste, and our overall carbon footprint. Because sustainability isn't just a feature, it's our foundation.

Redesigned Cartridge for Easy Recycling

We've reengineered our ink cartridge for better recyclability. By redesigning the pressure release mechanism, we've made it easier to disassemble, improving the recycling process and reducing waste.

EPS-free, recyclable packaging

Our award-winning moulded pulp packaging replaces Expanded Polystyrene (EPS) within our printer packaging. Developed with advanced simulation technology, ensures durability and flexibility for safe product delivery. It uses fewer resources, making it environmentally friendly and easy to recycle.

Built to Last

Longevity is sustainability. Our printer is designed to deliver reliable performance. Meaning fewer replacements, less electronic waste, and more value over time.
